OUR BRIEF STORY

Enhanced Innovations Projects (Pty) Ltd (EIP) emerged in 2012 as a 100% black-owned enterprise, specializing in Construction and Electrical Engineering. Our multi-disciplinary services also cater to Electrical Supplies and Electrical Contractors, offering a blend of diversified expertise, leadership, and strategic business counsel capabilities. We are organized and structured to assist clients in their endeavours while we all achieve.

We have assembled a deep base of business knowledge within our company an with our partnership with different companies; we have thus earned a reputation for the supply of full turnkey solutions for municipalities and utilities. Our company thereof has its focus on realistic service delivery through infrastructure development, facilitation and implementation.

MISSION

our present purpose

To excel and champion the supply and provision of all infrastructures needs by continuously providing value added services through innovative solutions, consultancy and installation services, guided by health and safety standards in compliance with Occupational Health and Safety Act.

WHY CHOOSE US?

We promise to provide quality, effective and efficient service.

VISION

our future aspirations

Our vision is to be a professional Service Provider that is committed to Service Excellence through Innovation, Efficiency and Expertise in all our operations.

HOW WILL WE DO THIS?

By ensuring personnel involvement of our principals.

OUR VALUES

Long-term Relationships for Tailored Service

Our belief in foregoing long-term relationships with clients and their specific environment enables us to fully understand the needs and provides a service that is tailored to suit the client.

Accessible Key Management Team

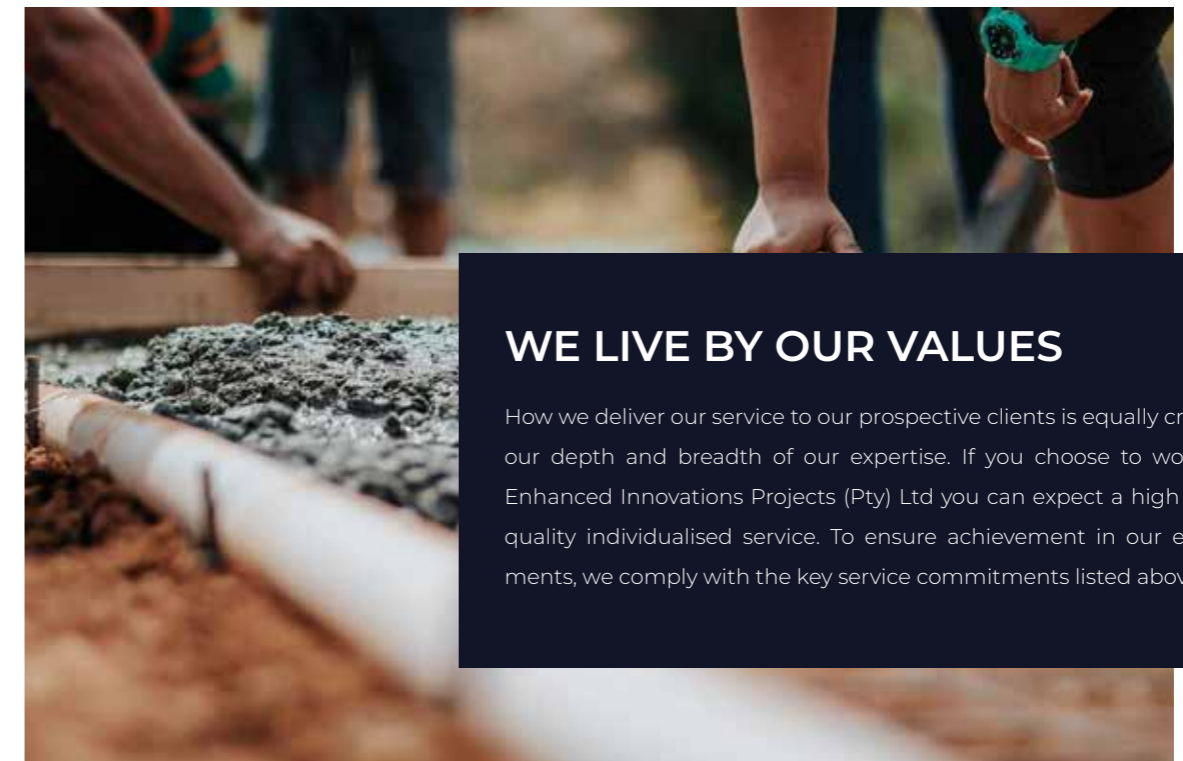

From the onset, a key management team is assigned to be accessible and approachable at all times.

Team Work

The company believes in the importance of building team units for the sake of building teamwork. While the client executives and our key personnel will ensure overall control of the assignment, clients will have access to a number of other experts should the need arises.

Investment in our People

In order to provide a high level service, a need has arisen to recognize personnel development in our human resources. It has become imperative that all our staff is equipped with the necessary skills in technical, personal and commercial development. These are achieved through continued professional development programmes and encourage innovative solutions.

WE LIVE BY OUR VALUES

How we deliver our service to our prospective clients is equally crucial as our depth and breadth of our expertise. If you choose to work with Enhanced Innovations Projects (Pty) Ltd you can expect a high level of quality individualised service. To ensure achievement in our engagements, we comply with the key service commitments listed above.

OUR PHILOSOPHY

 <p>Culture of Delivery</p> <p>We endeavour to create a culture of exceptional delivery within the organisation, which will surpass the expectations of our client. This is done by training and development of all employees in order to change mind set and to calculate the culture of superior service in the minds of our employees.</p>	 <p>Team Dynamics</p> <p>We recognise that we are a team in the diverse society. We value each stakeholder including supplier, clients and society at large. We respect them, co-operate with them and contribute positively to the welfare of each identified stakeholder.</p>	 <p>Quality</p> <p>We endeavour to always carry out and develop a qualitative product. This we achieve by building quality into all facets of our performance and activity. Quality is built into planning, organizing, and implementation, execution stages of our activities. The final product thus inherent quality as processes that eliminated and production costs are low.</p>
 <p>Training & Development</p> <p>We believe that training and development of people is an investment that Our training and development is not only geared at equipping all the stake holders in our organization with respective skills and competencies, but is also aimed at changing attitude and perceptions. We pride ourselves in this value and believe that this is the only workable solution to create the culture of performance and harmony within our organisation.</p>	 <p>People</p> <p>We value people as cornerstone of our organization. We are aware of the people's divergences, including divergent attitudes and contribute cultures and values. We believe that this diversity in people is source of motion. We recognise the fact that each individual has a role to play and endeavour to harness divergent people to create winning solutions and a winning organization.</p>	 <p>Natural Environment</p> <p>We believe that the natural environment is a gift that we need to cherish, groom and protect. In all our dealings and activities, we pledge not to pollute and destroy nature in anyway. Our activities and projects are carried out in a way which there is minimal effect on the environment other than to enhance it. We take care not to impose negative phenomena on our natural environment including rivers, landscape, mountains and hills as well as the air we breathe.</p>

Our expert team specializes in the construction of primary and secondary roads, bridges, and water reticulation systems, essential components of any development.

Road Constructions

Aqueduct Infrastructure Solutions provides We collaborate closely with stakeholders to deliver safe, durable and cost-effective transportation infrastructure (including roadway rehabilitation, new roadways and highway expansions) that enhances connectivity and mobility for communities.

CIVIL INFRASTRUCTURE

OUR SERVICES

Supply of Water Pumps

Ensuring access to clean and reliable water is fundamental to the well-being of communities and the success of infrastructure projects. We supply a wide range of water pumps designed to meet various requirements, from residential to industrial applications. Our pumps are sourced from trusted manufacturers and are known for their durability, efficiency, and performance. Whether you need submersible pumps for groundwater extraction or centrifugal pumps for water distribution systems, we have the expertise and products to fulfill your needs.

Supply of Electrical Motors

Electrical motors are essential components in numerous infrastructure systems, driving machinery and equipment across various sectors. We offer a comprehensive selection of electrical motors, catering to diverse applications and industries. From standard AC motors to specialized DC motors, we supply products from leading manufacturers known for their reliability and innovation. Whether you require motors for water pumps, conveyors, HVAC systems, or other machinery, we provide solutions tailored to your specifications.

Supply of Electrical Equipment

We offers a wide range of electrical equipment to support infrastructure projects. Our inventory includes Ring Main Units (RMU's), Poles, MV & LV Transmission Lines, Transformers, Mini-Substations, Streetlights, High Masks, Service Cables, Control Boxes (Public Lighting Control), Distribution boards & Ready-boards Conduits, sourced from reputable suppliers known for their quality and compliance with industry standards. Whether you're undertaking a new construction project or upgrading existing infrastructure, we provide the necessary electrical components to ensure safety, efficiency, and reliability.

ELECTRICAL INFRASTRUCTURE

OUR SERVICES

Waste Management

We offer efficient and reliable waste collection services for residential, commercial, and industrial clients. Our trained professionals ensure timely and proper disposal of waste, adhering to all safety and regulatory standards.

With expertise in landfill design, construction, and management, we help communities, municipalities and industries establish safe and environmentally sound landfill facilities. From site selection to ongoing maintenance, we prioritize sustainability and compliance with regulations to ensure long-term viability.

We understand the importance of rehabilitating landfill sites to restore natural habitats and mitigate environmental degradation. Our team employs progressive rehabilitation techniques to stabilize side slopes, revegetate completed cells, and enhance biodiversity, promoting ecological balance and ecosystem health.

We conduct comprehensive environmental impact assessments to evaluate the potential effects of waste management activities on ecosystems, air and water quality, and human health. Our detailed analyses inform decision-making processes and guide the development of sustainable waste management strategies that minimize adverse impacts and maximize environmental benefits.

WASTE MANAGEMENT

OUR SERVICES
